

Chemical Changes

What are chemical changes?

-a property used to characterize materials in reactions that change their identity

Name : _____

Date : _____

Part A

1- What is a chemical change?

2- Contrast a chemical change with a physical change of matter.

3- Give three examples of a physical change

- a) _____
- b) _____
- c) _____

4- Give three examples of a chemical change

- a) _____
- b) _____
- c) _____

Part B

1- Why have you decided to do this experiment specifically?

2- In terms of material, what have you used?

3- Did your experiment go according to plan? Justify your answer.

Part C

1- Describe the chemical change that you have caused in your experiment

2- Explain why is your experiment an example of a chemical change?

3- Explain why it is not a physical change?
